

HOL Hospitality

But first... Coffee

The Hands On Learning (HOL) Program was implemented to provide our students with a wider choice of curriculum. This program has intentionally been designed to provide a complete alternative to the classroom structure where students experience an entirely different and stimulating learning environment.

Small groups of students across year levels work with two Artisan Teachers (employed by the school) for full and half days, once a week, on creative building projects within our school and local community.

This year we have extended our Senior HOL program to cater to its ever growing popularity by introducing Junior HOL and HOL Hospitality.

All our HOL programs both trade and hospitality, cater to the different ways young people learn, helping students build confidence, engage and achieve at school through a practical approach to learning. Students thrive developing the creativity, self-discipline and interpersonal skills vital for the 21st Century workforce.

Through this practical experience we aim to teach basic small business principles and develop a sense of confidence that students can do! Students learn to be leaders, problem solve, and meet deadlines in a workplace like setting. Their participation in marketable hands on projects will link their efforts with the real world and provide the necessary incentive to refine and develop their skills.

HOL is a fantastic opportunity that our students love and look forward to every week! For More information or to express your interest in having your child participate please contact the college and leave your details and a member of staff will get back to you.
