

Hands On Learning Hospitality

A student lead initiative at Brookside P-9 College

We are excited to introduce the extension of our Hands on Learning (HoL) program at Brookside with ***HoL Hospitality!*** We have seen how students can produce an amazing result in a very short space of time when given the opportunity to participate in something real and exciting!

Students have been working extremely hard on their branding and business plan, have obtained their Barista and Food Safety Certificates and now ready to open their very own Café! Through this practical learning approach we aim to teach basic small business principles and develop a sense of confidence that students can do! Participation in the program will link their efforts with the real world and provide the necessary incentive to refine and develop their workforce skills that will be needed for a successful future.

We actively seek involvement in community projects and partnerships, which are great opportunities for students to foster positive attitudes towards community and business, teaching our students the value of shared goals and purposes, which are the fabric of our society.

But first... Coffee
